Index of Subjects

Adrenergic receptors, mammary gland, 47
α-Aminoisobutyric acid, transport, mammary gland, 9
Arsenic, content, Spanish cows' milk, 83

Bacillus spp., isolation, milk, cream, 529

Camel, milk composition, Ca, P concentration, 567
  milking frequency, effect of, 451
α_{s2}-Casein, intrachain disulphide bridge, 485
β-Casein peptide-42, structure, 495
κ-Casein, intrachain disulphide bridge, 485
Cheddar cheese manufacture, from ultrafiltered milk, 117
Cheddar cheese ripening, peptides, water-insoluble fraction, 587
  starter bacteria, autolysis, proteolysis, 249
Cheese, ewes', effect of freezing, 133
  proteolysis, TNBS-reactive groups and PTA-soluble N, 437
  residual chymosin, detection, 101
  unsaturated oxo fatty acids, identification, 111
Cheese ripening, Idiazabal cheese, free fatty acids, changes, 281
Chymosin, *see* **Rennin**
Coagulation, milk proteins, heated homogenized milk, 507
Coagulum, lactic casein manufacture, 59

Dairy products, flavour, determination, 289
Disease, *see* **Mastitis**
Dried milk, agglomerates, size, rate of dispersion, measurement, 201

ELISA, detecting cows' milk in goats', ewes' milk, 91
  proteolysis, detection, raw milk, 395
Enterococcus faecium, inactivation, heat treatment, 263
Escherichia coli, mastitis, milk fatty acids, 191
Ewes' cheese, effect of freezing, 133

Fatty acids, milk, mastitis, 191
  unsaturated oxo esters, cheese, 111
Fertilizers, nitrogen composition, renneting properties, milk, 179
Flavour, dairy products, determination, 289
  milk, *Geotrichum candidum*, 241
    odorants, detection, 385

Geotrichum candidum, flavour milk, 241
γ-Glutamyltranspeptidase inactivation, heat treatment, 263

Heat stability, *see* **Coagulation**, milk proteins, heated
Homogenization, heated whole milk, effect on, 375
  heat stability, milk, 507
1α-Hydroxycholecalciferol, Ca, P concentration, camel milk, influence on, 567

Ice cream, khoa, milk solids source, 143
Idiazabal cheese, ripening, free fatty acids, changes, 281

Khoa, milk solids source, ice cream, 143

α-Lactalbumin, pig mammary explants, 35
Lactic casein, manufacture, heavy coagulum, 61
Lactobacillus spp., amino N, acetaldehyde levels, effect on yogurt, 581
  strain identification, 573
Lactococci, immobilized, response to phage infection, skim milk, 537
Lactococcus lactis* subsp. *lactis T-80, binding with Trp-P1, 311
Lactoferrin, equine, bovine, human, iron binding strength, 563
  trypsin, effect of, 427
β-Lactoglobulin, aliphatic aldehydes, modified by, 209
  A, B, gelation, denaturation, 221
  pig mammary explants, 35
Listeria innocua, generation time, enrichment broth, 433
Listeria monocytogenes, generation time, enrichment broth, 433

Machine milking, teatcup liner, forces on teat, 467
Malvern Particle Sizer, milk powder agglomerates, 201
Mammary gland, *see also* **Udder**
  adrenergic binding sites, 47
  α-aminoisobutyric acid, transport, rat, 9
  development, whey proteins, sow plasma, 21, 35
  intramammary pressure, luteal oxytocin, ewes, 345
Mastitis, phagocytic activity, polymorphonuclear neutrophil leucocytes, 271
  triacylglycerol fatty acids, milk, 191
Milk composition, arsenic content, Spain, 83
  inorganic constituents, ion activity product, for calcium phosphate, 423
  milking frequency, effect of, camel, 451
  minerals, distinguishing, cows', ewes', goats', 151
  nitrogen, effect of N fertilizer, grass, supplementary feeds, 179
  retinol, determination, 233
Milk fat, *trans* fatty acids, 517
Milk powder, *see* **Dried milk**
Milk proteins, *see also* **Whey proteins**
  breakdown, *see* **Proteolysis**
  thermal stability, mares', 419
Milk yield, during lactation, goats, 457
  milking once daily, 441
  prediction, models, 415
  somatic cell count, milk conductivity, short-term, effect of non-milking, 317
Milking frequency, once daily, effects, 441
  secretion rate, composition, camel, 451
  short-term non-milking, effect of, 317

Mozzarella cheese, sensory rheological properties, improvement, 299
stretchability, 405
Mutagenicity, inhibitory effect, dairy products, 545

Odorants, detection, heated milk, 385
Oxytocin, blood, during lactation, goats, 457
during milking, 323

Parmigiano-Reggiano cheese, oligopeptides, 365
Plasma, cell membranes, water and soluble transport, regulation, prolactin, 155
Polymorphonuclear neutrophil leucocytes, phagocytic activity, 271
Prolactin, blood, during lactation, goats, 457
regulation, water, solute transport, plasma cell membranes, 155
Proteins, *see* **Milk proteins, Whey proteins**
Proteolysis, cheese, TNBS-reactive groups, PTA-soluble N, 437
peptides, water-insoluble, Cheddar cheese ripening, 587

Rennet, coagulation, milk, with sucrose, 473
Renneting properties, milk, effect of N fractions, 179
Rennin, residual, cheese, detection, 101
Retinol, milk, determination, 233

Starter bacteria, Cheddar cheese ripening, 249
Sucrose, addition, rennet coagulation, milk, 473

Taurine, transport, mammary tissue, rat, 335
Teat, -cup, liner wall movement, 1
forces, teatcup liner, machine milking, 467
Trypsin, lactoferrin, effect on, 427

Udder, *see also* **Teat**
anatomy, during lactation, goats, 457
milk, accumulation, between milkings, 167
UHT, milk, heating indicators, 305
Ultrafiltration, Cheddar cheese manufacture, 117
whey, influence of pH, 355

Vitamin A, *see* **Retinol**

Whey, ultrafiltration, influence of pH, 355
Whey proteins, *see also* **α-Lactalbumin, β-Lactoglobulin**
concentrate, gelation mechanisms, changes, pH, temperature, 71
mammary gland, activity, indication, sow, 21, 35

Yogurt, amino N acetaldehyde levels, effects of *Lactobacillus* spp., 581
lymphoid cells, gut, effect on, mice, 553
